Secretary Chu Announces Major New Recovery Act Milestone: 300,000 Homes Weatherized January 19, 2011

U.S. Department of Energy Secretary Steven Chu today announced that states and territories across the country have now weatherized more than 300,000 low-income homes under the Recovery Act, a major milestone in the Department's efforts to reduce home energy bills for families. This means that states are now more than 50 percent of the way toward meeting President Obama's goal of weatherizing approximately 600,000 homes under the Recovery Act. The weatherization program is helping families save money on their energy bills by improving home energy efficiency with upgrades like insulation, air-sealing, and more efficient heating and cooling systems. The program has also trained a new generation of clean energy workers and is employing more than 15,000 workers nationwide.
